## class 1a

27.05.2014 -

The 27 of November 2013 20 children from first grade (class 1A from the Evangelische Grundschule) visited our Department. It was a funny day, the kids learned how to isolate DNA from a banana, to see the onion skin under the microscope, to measure pH, to make foam out of yeast and to use the pipettes.

It was a lovely day and we do hope that the children enjoyed the day with us.

Thanks for the visit!
